EVOLVING THE NEW ERA OF INTELLIGENCE

THE TRANSFORMATION

AI LEARNER → AI BUILDER → AI SYSTEMS ARCHITECT

AI LEARNER

Learn the Fundamentals

Concepts

Tools

Foundations

Prompts

Prompt Engineering

AI Agents

Integrations

Automations

AI SYSTEMS ARCHITECT

Design, Orchestrate & Scale AI Systems

System Design

Orchestration

Scale

Impact

Start as a Learner.
Build your foundation.

Become a Builder.
Create real solutions.

Evolve into an Architect.
Design systems that create impact.

The future belongs to those who **build it**.

LEARN TODAY. BUILD TOMORROW. ARCHITECT THE FUTURE.

ABOUT THE INSTRUCTOR

8+ years in software and
AI systems Development

Founder - **Evonuera**

EXPERTISE:

Designed and deployed
real-world AI systems
used in production

Expertise in RAG, AI
automation, and orchestration

Delivered production-ready
GenAI solutions

Saved 100+ engineering
hours using AI systems

FOCUS:

Building real-world
AI systems

Training professionals
to adopt AI effectively

PRADEEP SUBRAMANIAN

evonuera

EVOLVING THE NEW ERA OF INTELLIGENCE

This program is designed for:

Software engineers
who want to transition into AI

Professionals
who want to automate work using AI

Freelancers
building AI-powered solutions

Business owners
exploring AI automation

Beginners
who want a structured path into AI systems

**No prior AI or
Programming experience required**

Roadmap - Overview

This program focuses on building real AI systems -
not just learning tools.

Week 1

- AI THINKING
- AI FUNDAMENTALS
- PYTHON FOR AI
- AI WORKFLOW CODING

Week 2

- PROMPT ENGINEERING
- ADVANCED PROMPTING
- AI RELIABILITY
- BUILD SIMPLE AI APP

Week 3

- LLM ORCHESTRATION
- LANGCHAIN
- RAG SYSTEMS
- CONTEXT & MEMORY

Week 4

- AI AUTOMATION (N8N)
- WORKFLOW DESIGN
- API INTEGRATION
- AI WORKFLOWS

Week 5

- AI AGENTS
- TOOL-USING AGENTS
- MEMORY AGENTS
- AGENT APPLICATIONS

Week 6

- MULTI-AGENT SYSTEMS
- AGENT COLLABORATION
- CREWAI FRAMEWORK
- AGENT ARCHITECTURES

Week 7

- VOICE AI SYSTEMS
- LIVEKIT VOICE AGENTS
- AUTOGEN AGENTS
- HUMAN-IN-THE-LOOP AI

Week 8

- MCP AI SYSTEMS
- AGENT INFRASTRUCTURE
- PRODUCTION DEPLOYMENT

Final Module :

Build & Launch an AI MicroSaaS Product

THE LEARNING PATH

From Foundations to AI Products –
A Step-by-Step Journey to Master AI Systems

PRACTICAL PROJECTS

Hands-on learning at every stage

EXPERT MENTORSHIP

Learn from industry practitioners

REAL-WORLD DEPLOYMENT

Deploy and scale your solutions

BUILD PORTFOLIO & CAREER

Build a strong portfolio and unlock AI opportunities

WEEK 1 - FOUNDATIONS OF AI THINKING

Build a strong conceptual foundation to think, reason and build with AI.

01

Understand AI, ML, Deep Learning & Generative AI

Clearly understand what AI, ML, Deep Learning, and Generative AI actually mean (no technical confusion).

02

Think Logically with AI Systems

Learn how to think logically with AI systems instead of randomly using tools.

03

Set Up AI Development Environment

Set up their own AI development environment (step-by-step, beginner friendly).

04

Understand Basic Programming Concepts

Understand basic programming concepts needed for AI workflows.

05

Build & Run First AI Application

Build and run their first simple AI-powered application.

OUTCOME:

Learners build a strong conceptual foundation and understand how modern AI systems are designed and deployed.

WEEK 2 - PROMPT ENGINEERING AND AI TOOLS

Master the art of communicating with AI and leverage the best tools.

PROMPT

01

LEARN HOW TO STRUCTURE PROMPTS TO CONTROL AI OUTPUT

Learn how to structure prompts clearly to get accurate and controlled AI output.

02

IMPROVE AI REASONING USING PRACTICAL PROMPTING TECHNIQUES

Learn advanced prompting methods to improve AI reasoning and results.

03

REDUCE WRONG OR MISLEADING AI RESPONSES

Apply strategies to reduce hallucinations and get more reliable AI responses.

04

GENERATE STRUCTURED OUTPUTS USABLE IN BUSINESS OR DEVELOPMENT

Create outputs that are clean, structured, and easy to use.

05

USE AI TOOLS FOR FASTER LEARNING, CODING, RESEARCH, AND PRODUCTIVITY

Leverage the best AI tools to save time and work smarter.

OUTCOME:

Learners gain structured control over model behavior and improve output accuracy and reliability.

WEEK 3 - LLM ORCHESTRATION & KNOWLEDGE SYSTEMS (RAG)

Build AI systems that find, understand, and use the right information.

YOUR DATA

01

Understand how AI searches and retrieves information from data.

02

Build a system that answers questions from their own documents.

03

Learn how businesses give AI access to company knowledge.

04

Improve AI accuracy using better context handling.

05

Create a working AI knowledge assistant.

AI KNOWLEDGE ASSISTANT

Ask questions. Get accurate answers from your data.

OUTCOME :

Learners build intelligent knowledge systems capable of retrieving and reasoning over structured data.

WEEK 4 - AI AUTOMATION & WORKFLOWS (n8n)

Automate smarter. Connect everything. Deliver more.

Visualize. Automate. Scale.

01

Understand how repetitive business tasks can be automated.

02

Build workflows that connect AI with tools like email, WhatsApp, Google apps, etc.

03

Create structured automation without heavy coding.

04

Build AI-powered systems for classification, summarization, and reporting.

05

Deploy automation systems useful for real-world business needs.

OUTCOME :

Learners design and deploy production-ready AI-powered automation systems.

WEEK 5 - AI AGENTS & INTELLIGENT AUTOMATION

From AI that **answers** → to AI that **thinks, decides & acts**.

01

Understand what an AI agent is and how it thinks and acts.

02

Build an AI system that can take actions instead of just giving answers.

03

Add memory so the AI can remember conversations and data.

04

Control and improve agent decisions safely.

05

Build a functional intelligent assistant for real use cases.

OUTCOME:

Learners can design and build agent-based AI applications.

WEEK 6 - ADVANCED AGENTIC AI SYSTEMS

Build intelligent teams of AI agents that collaborate, reason and deliver results.

01

Understand how multiple AI agents can work together like a team.

02

Design systems where different AI roles collaborate on tasks.

03

Build structured multi-agent workflows.

04

Handle coordination and communication between agents.

05

Create advanced AI systems capable of solving complex tasks.

OUTCOME :

Learners gain architect-level understanding of multi-agent systems.

WEEK 7 - VOICE AGENTS & ADVANCED AUTOGEN SYSTEMS

Build voice-enabled, intelligent agents that listen, think and act.

Hello! How can I assist you today?

SPEECH INPUT

User speaks

AI RESPONSE

AI understands and responds

SPEECH RECOGNITION

LLM PROCESSING

TEXT TO SPEECH

ACTION & INTEGRATION

REAL-WORLD USE CASES

Customer Support

Appointment Scheduling

Sales Assistant

Learning Companion

And More

01

Understand how voice-based AI systems work in real time.

02

Build a voice-enabled AI assistant.

03

Connect speech input and AI responses into a working system.

04

Create programmable AI agents using structured frameworks.

05

Deploy a voice AI system usable in real-world scenarios.

OUTCOME :

Learners build real-time, programmable, and voice-enabled AI systems.

WEEK 8 - MCP & PRODUCTION AI SYSTEMS

Build reliable. Secure. Scalable. Production-ready AI systems.

PRODUCTION AI SYSTEM ARCHITECTURE

01

Understand how AI systems are structured for production use.

02

Connect AI agents securely with external tools and services.

03

Design scalable AI systems for real-world deployment.

04

Learn reliability, monitoring, and optimization basics.

05

Prepare AI applications for professional-level usage.

OUTCOME :

Learners standardize, deploy, and scale production-grade AI systems.

FINAL CAPSTONE: BUILD & LAUNCH AI MICROSAAS

From idea → product → users → revenue

YOUR JOURNEY: IDEA TO INCOME

AI IDEA

Identify a real problem

BUILD

Develop AI-powered application

DEPLOY

Go live on the internet

MONETIZE

Get paid. Grow. Scale.

01

Turn an AI idea into a real product.

02

Build a complete AI-powered application from scratch.

03

Deploy it live on the internet.

04

Integrate payments and subscriptions.

05

Launch a revenue-generating AI MicroSaaS.

Payments

stripe razorpay

Subscriptions

Monthly Plan \$29 /month

Yearly Plan \$299 /year

Live & Running

<https://yourapp.com>

OBSERVABILITY & MONITORING

Logs

Metrics

Tracing

Alerts

Dashboards

DEPLOYMENT & INFRASTRUCTURE

Cloud / On-Prem

Scalable

Secure

Cost Optimized

High Availability

OUTCOME:

Learners build, deploy, and monetize a fully functional AI MicroSaaS product.

WHAT YOU GET IN THE PROGRAM

From **idea** → **product** → **users** → **revenue**

THE PROGRAM

	RECORDINGS + GUIDED SESSION	Login from computer + mobile app
	RECORDINGS ACCESS	6 Months
	DAILY	Daily session on follow-up (synchronised)
	WEEKLY	Live doubt-clearing session
	BUILDATHON	Buildathons — build in real time
	LIFE LONG	Community support
	LIVE CAPSTONE PROJECT	End with a live capstone project + certificate

Login from
anywhere

Secure
& private

Sync across
devices

Learn at your
own pace

THE BONUSES

	2000+	Ready n8n workflows, lifetime access
		Reusable AI system templates
	LIFETIME	Community access & support
	WEEKLY	Sessions on what's new in AI

Not a video course.
A guided build, for 8 weeks.

ACCESS FROM LAPTOP & MOBILE TAB

Learn seamlessly on your laptop or mobile tab.
Your learning journey, anytime, anywhere.

Learn
